

The Best 2021 Skis for Senior Skiers

FOR THE 50+ SNOW ENTHUSIAST

Each year, **SeniorsSkiing.com** collaborates with **Realskiers.com** to inform its readers about skis that allow older skiers to turn more easily and to ski longer without tiring.

The pandemic arrived just in time to eliminate the comprehensive women's test, but **Realskiers.com** was still able to collect sufficient data to pick the best models for male senior skiers, many of which may be used by either gender.

Most of the selected skis have relatively soft flex, which helps them engage the snow with minimal exertion. Regardless of one's physical condition, using skis with these characteristics allows older skiers to turn more easily and to ski longer without tiring.

The Best 2021 Skis for Senior Skiers listing shows Men's choices only, and both Men's and Women's choices from 2019-20. We did this to help readers interested in new skis as well as to help those of you who may run across previously owned boards at a Swap or Sale.

Those identified as women's skis sometimes are engineered for female size and physique.

The recommended skis are grouped into five categories, each based on the ski's width, which helps determine the terrain where its performance is optimized.

SeniorsSkiing.com recommends that when purchasing new skis, older skiers should start by choosing the most suitable category and work with a quality ski shop where they can demo before purchasing.

Best 2021 Skis for Senior Skiers
